## COMPANY PROFILE

REINAGRI (Pty) Ltd prides itself on its commitment to quality and sustainability, using only the highest quality ingredients and environmentally friendly products. Our company focuses on the fields of agriculture, chemistry, and microbiology to work closely with farmers to develop customized products and disinfection protocols that are tailored to their specific needs and requirements.

## REINCLEAN DISINFECTANT

REINCLEAN DISINFECTANT is easy to use and its effectiveness has been scientifically confirmed through extensive research, testing and application. The key component of REINCLEAN DISINFECTANT is Hypochlorous acid (HOCl), which serves as a natural and potent disinfectant. HOCl has been deemed completely safe to use on skin, surfaces, and even around babies and pets, while still being incredibly effective at eliminating germs, viruses, microbes and bacteria.

## FOR SNAIL FARMING

REINCLEAN DISINFECTANT is an ideal broad-spectrum antimicrobial agent for all intensive or semi-intensive snail housing systems to be applied on surfaces, farming equipment and even directly on snails. Once applied, a short contact time of 30 seconds to all surfaces is needed to eliminate 99.99% of fungi, bacteria and viruses. This product is NRCS approved and has no harmful chemicals, hazardous materials or alcohol in its ingredients serving as a complete non-toxic solution to be safely applied on all Mollusca phyla and snail farming practices.

## SNAILS - REINCLEAN BENEFITS

- ✓ Offers a range of applications for infection prevention and hygiene maintenance
- ✓ It can be used as a hand sanitiser to prevent the spread of germs and cross-contamination.
- ✓ Effective as a surface and equipment disinfectant to ensure thorough cleaning.
- ✓ Air-purification agent to maintain a clean and healthy environment.
- ✓ Dosing agent for water supply to provide complete protection against harmful pathogens.
